DISTRIBUTING INNOVATION

Late Spring 2010

Aqualuma Underwater Lighting to Launch 2 New Products

Aqualuma Underwater Lighting offers consumers an opportunity to create perfect illumination and an exquisite ambience around their boat at night using specially adapted LED lights. Focussing on customer needs these products offer superior bright underwater lighting with low current consumption and low running costs.

All Aqualuma lights are corrosion resistant, with housings that makes them strong and robust against shock and vibration. For a demonstration of the strength of the thru hull light housing you can see a short video clip at:

www.youtube.com/watch?v=i_8U8Tr2vM

The following new products enhancing the Aqualuma range will be available in late June

9 LED Spreader / Flood Light

For those who want high quality lighting on deck or mast this 9 LED light draws less than 1.4amps when operating from a 12volt DC (it can accept 24volts DC). Machined from Billet Aluminium, it is hard anodised in colours to suit owners and vessels alike, enabling it to blend in seamlessly and illuminate in the evening setting a relaxing and mood enhancing atmosphere. This particular light comes with an installation kit, an ultra slim profile and a two year warranty.

Be the first to get this product in Europe contact: tmi@tidesmarine.com

9 LED Flush / Surface Mount

Aqualuma Underwater Lighting is best known for its thru hull lighting options on its 1 Series, 3 Series, 6 Series and Tri Series lights. Thru hull lights are not always an option depending on the boat, hull or owner preference. To meet these requirements, Aqualuma have developed a Flush Surface Mount. The light comes with an installation kit, 2 year warranty and is available in brilliant white, ultra blue and ultra green.

To find out more details on the surface mount range contact us today : tmi@tidesmarine.com

معرض دبي
العالمي للقوارب

DUBAI INTERNATIONAL
BOAT SHOW

Tides Marine and Armstrong Nautical at the Dubai Boat Show

Tides Marine and Armstrong Nautical Products teamed up at the recent Dubai International Boat Show (DIBS) which is considered to be the most important and established event of its kind in the Middle East region and Indian subcontinent.

Attracting tens of thousands of visitors each year, the multi-award winning event is among the top five leading international boat shows in the world. DIBS is proud to be the chosen and trusted platform for world leading companies to showcase their World Premiers and Regional Launches.

On display were the range of Armstrong telescopic ladders including the award winning RIB ladder as well as Lloyds Register certified shaft seals and rudder bearings by Tides Marine.

The show proved to be a great success and the level of interest and orders taken to date will ensure our return in 2011.

Tallon Systems portfolio continues to build pace

Boating accessory innovators Tallon Systems launch “The Ultimate Drinks Holder”. Accessory hungry boaters will not be disappointed by the latest innovations from this New Zealand based manufacturer.

Tallon Systems supply the broadest range of easily installed, flexible, stylish and strong marine accessories. Their receiver system enables users to personalise and set up their boats exactly as they wish. This simple innovative product which is available in stainless steel, white and black face plate finishes allows you to interchange a broad range of accessories from drinks holders, to TV mounts, fishing rod and dive bottle holders and can even supply power for lights and VHF’s.

The new developments from Tallon Systems in drink holder technology, means users now have an accessory which is suitable for a large variety of drink containers. The holder is made from durable Zytel™ plastic and it’s stylish curves will add zing to any boat. The stepped interior means that it can hold almost every drink imaginable from bottles to cans and tumblers. A clever cut-out allows the holder to cater for wine glasses and coffee cups too – a trick few, if any, rival products have mastered! The icing on the cake is rubber inserts inside the holder which grip the contents securely - be it a bottle or a coffee mug - preventing slop or rattle when underway.

Duncan Good, General Manager of Tallon Systems said: “This is a serious product that meets the needs of almost every boat owner, but it hasn’t stopped us having a lot of fun creating it! I don’t believe there is a better drink holder on the market — this is the ultimate drink holder.”

TIDES MARINE INTERNATIONAL SUPPLY TO NO LIMITS SHIPS

Tides Marine International working with their Dutch distributor Cuno b.v, part of the Exalto Group, is pleased to be supplying SureSeal dripless propeller shaft seals and Smart Seal temperature monitoring systems to No Limits Ships based in Holland, who specialise in building survey vessels to be operated in both offshore and shallow water applications.

The equipment will be used on No Limits Ships Pleasure and Professional ranges of craft. Established in 1996 No Limits Ships have a wide range of custom made vessels which are used for a variety of commercial purposes such as hydrographic surveying, patrolling, coastguards, surveillance as well as transporting passengers inshore and offshore.

No Limits Ships have been impressed with the quality of product supplied by Tides Marine International, who have been awarded the ISO 9001:2008 Certification in recognition of its quality management systems for the supply of marine equipment.

TIDES MARINE INTERNATIONAL SUPPLIER OF CHOICE TO CORNISH CRABBERS LLP

Builders of Cornish Crabbers & Mystery Sailing Yachts.

Tides Marine International working with C&O Marine Engineers have been chosen by Cornish Crabber LLP based in Cornwall to supply Series 1 propeller shaft seals to their Cornish Crabber and Mystery Yacht ranges.

Custom made to order, these boats are built exactly to the specification the owner requires for their sailing experience.

Look out for the Tides Marine team at the following events:

Seawork Show - 15th—17th June 2010
METS - 16th—18th November 2010
