

Surface Mount

High-quality, ultra-reliable and super bright, the Surface Mount is perfect for boats not permanently kept in the water.

Aqualuma's Surface Mount is a high-powered light designed to mount to the transom of the vessel. The Surface Mount is a factory-sealed, self-contained fitting with a simple two-wire installation. It contains nine high-powered LEDs, making it one of the brightest surface mountable lights available on the market. The Surface Mount is also ideal for any vessel where a thru-hull application is not suited. Featuring onboard driver circuitry, it is manufactured from thermally conductive polymer, which ensures long life with no bonding required. Available in Brilliant White, Ultra Blue and Ultra Green, the Surface Mount comes with Aqualuma's 2 year warranty.

Technical Specifications

- 2 year warranty, low cost install, reverse polarity protected
- Cable length = 3.7m (12 ft) of tinned submersible cable
- Current draw = less than 1.4 amps @ 12 volts dc
- High-tech thermally conductive polymer housing
- Available in Brilliant White, Ultra Blue and Ultra Green
- Cable diameter 6mm/¼ inch, fitting kit supplied
- Long life, high output 9 LED light engine
- Can accept 12 or 24 volts dc, super slim profile
- Twin cable entry options (can be hidden or exposed)
- Recommended for any vessel where thru-hull applications are not suited
